Distance Educator- Training Educators of Adults in the digital age.

Distance Educator

We are thrilled to bring you the latest updates from the Distance Educator project. It has been an exciting time for us, with significant progress and successful milestones achieved. We are pleased to announce that the recent three-day training program, the "LTTA" and the transnational project meeting of our consortium were successfully completed in Poland from May 15th to 19th, 2023

During the training program, participants had the opportunity to engage in intensive learning sessions, exchange knowledge and best practices, and collaborate on various aspects of the project. The enthusiasm and dedication displayed by all attendees were truly inspiring. We extend our gratitude to everyone who contributed to making this training program a resounding success.

One of the highlights of the training was the preview of the EduAdult App. We are delighted to inform you that the app is almost ready, and we are making final preparations for its launch. The EduAdult application will ensure personalized training pathways by initially testing the knowledge and awareness of digitalization processes among the target group, adult educators, mentors, consultants, wannabe educators etc

As we near the completion of the app development, we are excited to embark on the pilot phase, which will be commencing shortly.

We will continue to keep you informed about our progress and upcoming milestones. Together, we can shape the future of distance education.
